It is a matter of pleasure that this young Institution established in 2005 has achieved so much in this short span of time. The college has developed departments of IT, Arts and has now added the Science department also. We expect that the college will reach new heights and will impart quality education to the girls. Women in India are under privileged, No matter how many facts and figures we may quote, the fact remains the same that the fruit of education has not reached to them in the measures in which it should have been and though we all know that education serves as the panacea to many evils of the society yet only about 50% of our female population is literate. This segment of society constitute one half of the population of the country, therefore no real development can take place without their involvement and participation.

There is little doubt that given the right direction and education, the girls can do wonders in every field by improving their skills. This implies all around uplifting of the rural girls in particular. If the girls are educated, the role of girls, in the tasks of construction of a new enlightened society, becomes even more relevant.

This college has been set up with a view to provide education to the girls of this particular area so that they can have an easy access to the education equipped with modern techniques and technologies.

Challenges posed by globalization and knowledge explosion need to be understood and addressed by the educational Institutions. In this context, continuous awareness of latest techniques, information, academic development & modern infrastructural development is required.

I sincerely hope that the day is not far when Pt. Mohan Lal S.D. College for Girls, Fatehgarh Churian will rank as one among the top ten best colleges of Northern India. For this and more, I wish great success to the dedicated faculty and students of the college and hope that they will realize this goal very soon.

# Message

Twenty first century is the era of rapid growth, globalization, computer and modern technologies. Due to these youth of today is facing challenges in every sphere of life. Education is the only means through which he can surpass all the hurdles of life to triumph the world. The main motto of education is not only to provide degrees but to humanize by inculcating good moral values.

We are putting our constant effort in positive directions to enable the institution to move ahead towards set goals. Keeping in mind the backwardness and ignorance of the surrounding area, our chief concern is to educate the girl child who either because of poverty or ignorance remains devoid of education.

The College which was setup in the remote area to nurture the dream of Pt. Mohan Lal Ji started in 2005 with ninety nine students. Since then the college has proved as a benchmark in the field of education. The college is permanently affiliated to Guru Nanak Dev University, Amritsar.

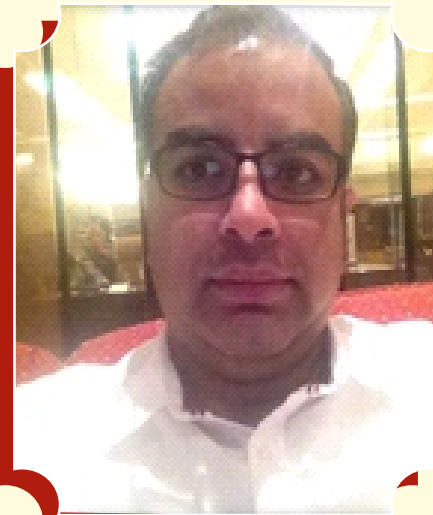

The power of education elevates us to great heights and puts us on lofty platforms. Our skills and potentials are explored through education only. Today, girls can make their presence felt in society through skills. An educated person has always an edge over an uneducated person. So Pt. Mohan Lal S.D. College for Girls extends great opportunity to the girls of the area to acquire knowledge and transform themselves. I am positive that the path to their upliftment is destined through our institution. Our institution is a panacea for their agile and vibrant development. The gates of our college are wide open for those who yearn to learn.

Since the covid-19 pandemic has disrupted the normal education system of interactive reading in class rooms, so the college has adopted the virtual platform to conduct classes online so that the link of students with the education may not be blocked. The college has put its best foot forward to spruce up their existing online platforms to the optimum level.

This institution is putting every effort to enhance the talents of the students for their better future. Though education these days has become very expensive and beyond the reach of a common man, we have tried our level best to make it within their reach. It is rightly said, educating a boy means educating a single person but educating a girl means educating a family. It is our motto to provide opportunities to the girls to be the better/worthy citizens.
